Directions

Separate Student Learning Assessment and Assessment Results tables must be provided for each IACBE-accredited program.

An example of a completed form can be found in a separate document that is available for download on the IACBE's website at: www.iacbe.org/accreditation-documents.asp.

Add tables, and insert or delete rows in the tables as needed in order to accommodate the number of your (i) business programs and (ii) intended student learning outcomes. In the sections of the assessment results tables entitled "Summary of Achievement of Intended Student Learning Outcomes," **DO NOT ADD OR DELETE COLUMNS**. Space is provided in these sections for four direct measures of student learning and four indirect measures of student learning. If you are employing fewer than this number of assessment instruments, simply leave cells in the unused columns blank. If you are employing more than this number of instruments, you will need to create additional summary-of-achievement tables to report your assessment information.

In the sections of the tables entitled "Summary of Achievement of Intended Student Learning Outcomes," enter "Met" in a given cell of the table if the performance target for the instrument in that column was achieved for the intended outcome in that row; "Not Met" if the performance target for the instrument in that column was not achieved for the intended outcome in that row; or "NA" (Not Assessed) if the instrument in that column does not measure the intended outcome in that row.

At the end of the assessment tables for each program, space is provided to identify changes and improvements that you plan to make as a result of your assessment activity.

Italicized entries in the form represent areas where the academic business unit should insert its own student learning information.

Be sure to delete these directions from the document before you publicly post your form.

Proposed program of Action for Improvement in Learning Outcomes for which Performance Targets Were Not Met 针对学习成果中没有达成的指标所拟定的行动方案								
1. Program ISLO 1: The knowledge and ability of the basic concepts in business function domain met the criteria of comprehensive examination and but did not meet the graduation thesis evaluation. The test results showed that students did not achieve the expected objectives of Business administration, finance, management and other disciplines. Teachers of school of management should comprehensively review core areas of business, and seek to strengthen students ' ability to comprehend concepts and theories of Business administration, Financial and Management Concepts and Theories. 有关商科功能领域基本概念的知识与能力达到综合性考试的评估标准但未达到论文评价标准。考试结果表明，学生达到工商管理、金融、管理学等学科领域的预期目标。管理学院的教师应该全面回顾商科核心领域，并努力寻求能够强化学生工商管理、金融与管理学概念与理论的方法与途径。								
2. Program ISLO 2: The knowledge and ability of the commercial legal environment, social environment and economic environment met the evaluation criteria of comprehensive examination and but did not meet the graduation thesis evaluation. Although the curriculum of the economic/social/legal environment has been established, the results of the evaluation still failed to reach the goal. Guiding teachers should strengthen the depth and breadth to the curriculum content of the economic/social/legal environment, and increase dimensions of global business, broaden students ' horizons and cultivate awareness of global business environment. 有关商业法律环境、社会环境和经济环境的知识与能力达到综合性考试的评估标准但未达到论文评价标准。尽管开设了关于经济/社会/法律环境的课程，但是评价的结果仍然没有达到目标。建议任课教师强化经济/社会/法律环境类课程内容的深度与广度，增加全球商业维度，开阔学生视野，培养全球商业环境意识。								
3. Program ISLO 3: The knowledge and ability of business ethics duty and responsibility meet the evaluation standard of comprehensive examination								

and other standard.

有关商业道德义务与责任的知识与能力达到综合性考试的评估标准和其他评估标准。

4. Program ISLO 4: The knowledge and ability to use decision support tools to make business decisions did not meet the evaluation criteria of comprehensive exam and internship evaluation and the target of graduation thesis evaluation and senior exit survey. The current courses on the auxiliary business decision-making are: Application statistics, management information system, project management, enterprise strategic management, etc. However, The results of the evaluation and investigation showed that the knowledge and ability of decision-making were not good enough. It is recommended to increase the hours of the decision support tool courses, to re-discuss and arrange the course content, to introduce practical cases and to develop students' practical application ability.
